

# SLSD Fall 2020 Re-Opening Plan

## 504 & IEP students

- **How will these options impact my child on a 504 Plan?**

If you choose **Option 1**- sending your child back to school daily, the classroom teachers will meet your child's needs as closely as possible with safety protocols in place. Your child will still receive the accommodations outlined in the 504 Plan.

If you choose **Option 2**- Your child will be assigned the Accelerate Education curriculum that the district has selected for our virtual option. A SLSD teacher of record will be assigned to your child and will make accommodations to the online assignments/tests per the 504 Plan.

- **How will these options impact my child on an IEP?**

If you choose **Option 1**- sending your child back to school daily, the IEP team will meet your child's needs as closely as possible with safety protocols in place. The team may need to make amendments to the IEP to keep students and staff safe throughout the day. Such as keeping aide services more consistent rather than multiple adults working with your child.

If you choose **Option 2** –

**INCLUSION MODEL**- The majority of our IEP students will be able to use the Accelerate Education curriculum that the district has selected for our virtual option. Your child will be assigned an Intervention Specialist who will work with you to develop appropriate virtual learning goals for the 1<sup>st</sup> semester. Your child will receive accommodations/modifications to the Accelerate Education curriculum as outlined in the IEP. Related services such as Speech, OT, & PT can be provided via teletherapy.

**MULTIPLE DISABILITIES MODEL**- Students in our Multiple Disabilities classrooms will not be assigned the Accelerate Education curriculum. Your child will be assigned an Intervention Specialist who will lead the IEP team in developing an appropriate virtual learning curriculum that is specifically tailored to meet your child's individual IEP goals. Students will likely be working through lessons from the Unique Learning curriculum which they have used in the classroom or other lessons developed by the teacher. Related services such as Speech, OT, & PT will be provided via teletherapy.
